

E. L Rose Conservancy Gas Informational Meeting

Questions from meeting

Who pays for road maintenance and damage?

Where is the main pipeline through this area going to run?

Who owns the land under the lakes?

Who determines ground water usage?

How good is the Fortuna lease? What is it missing?

If the groundwater aquifer is contaminated, can it be cleaned or will it clean itself?

If the gas developers can come back to a well anytime to frack or drill more, what happens to the reclamation timetable?

Can water or fluids injected down into the Marcellus shale ever come back out of the ground?

Can we put pressure on Pennsylvania for improving the treatment process for “frack” water?

Should we have a NE PA Environmental Coalition made up of existing organizations to coordinate efforts to address the need for better regulation?

Do we have a template for a non-developmental lease?

What happens to all the gas infrastructure after the depletion of the gas? Who’s responsible for the maintenance or removal?
